

Research Identifiers Fact Sheet

Scopus

This fact sheet is one of a series available that discusses how to create and manage an online academic profile. For research assistance contact the [Flinders University Library](#)

Why a Scopus Author ID?

Scopus publication data feeds into ResearchNow which only accepts one Scopus Author ID.

Getting your data right in Scopus streamlines your ResearchNow record and helps you keep it up to date.

A unified Scopus Author ID provides a complete profile and citation overview. Scopus is one the major sources for bibliometric information used in the scholarly community.

Check and merge duplicate profiles once or twice a year.

Affiliation

Scopus will update your profile affiliation with the affiliation of your most recently published (and indexed) paper. Ensure your affiliation is to Flinders University.

Scopus Author ID Researcher Profile Management

Merge multiple Scopus Author ID profiles into one to ensure your complete citation overview is available at a moment's notice. Add your Scopus Author ID to ResearchNow to make populating your researcher profile simple.
